

## BST level-order traversal (BFT)

```
public void BFT(Node<E> root) {  
    if (root != null) {  
        Queue<Node<E>> q = new LinkedList<>();  
        Node<E> temp = root;  
        q.add(temp);  
        while (!q.isEmpty()) {  
            temp = q.poll();  
            System.out.print(temp.value + " ");  
            if (temp.left != null)  
                q.add(temp.left);  
            if (temp.right != null)  
                q.add(temp.right);  
        }  
    }  
}
```
